

There are 2 ways to register. If registering more than one player **Create a Family Account**, once that is created then add players.

If only registering one player then create an **Individual User Account**.

- Once the account is created follow the prompts to upload a headshot - then save
- Click on the Family Members tab at the top and then select the "Add Player" button on the next screen.
- Once all players are added, go to the Family Members tab and scroll down to the first player you want to register and click on search for a club

- Once you have selected the club click on the "Register Now" button in the profile.
- Repeat for each player.
- You will need to complete the Medical Information page with emergency contacts, physician's information and health insurance information.

Items that you will need to have at hand during the registration process:

- Headshot of player to upload (close up of player shoulders up)
- Physician Name and Phone number
- Health Insurance information

It takes about 10 minutes to create a family account and one player profile, upload headshot and register for the Tryouts. It will take about 3-4 minutes more for each additional player.

It will take about 7 minutes to create an Individual account, upload headshot and register for the Tryouts.

If you have any questions please contact Marian Beagan 952-240-0867.
